Hello, I'm Allison!

I am an aspiring Software Engineer based in New York City and currently pursing a degree in Computer Science.
My interests lie in Artificial Intelligence, Data Science, and Robotics. Outside of technology, I love fashion, cooking, listening to music, and spending time with friends and family.

Education

Bachelor of Arts,   **Expected 2026**
Major: Computer Science;
Minor in Mathematics
CUNY Hunter College
Relevant Courses: Artificial Intelligence, Robotics, Data Structures and Algorithms, Computer Architecture, Computer Theory, Discrete Mathematics

High School Diploma,   **Graduated 2022**
Environmental Engineering
CTE
Bayside High School
Relevant Courses: Engineering Design and Development, Principles of Engineering, Desk Drawing Production

Technical Experience

Web Development Trainee   **July 2024**
CUNY Tech Prep
Completed technical courses in web development, focusing on full-stack development and front-end technologies using Javascript, HTML, and React.

Software Engineering Mentee   **March 2024**
Google Software Engineering Program (G-SWEP)
Engaged in 10 weeks of rigorous, technical, individualized mentoring sessions with a Google Software Engineer. Attended workshops designed to enhance technical problem-solving and interview skills.

Work History

Systems and Applications Technical Intern   **Starting Sep 2024**
Metropolitan Transit Authority
Assisted in application support, providing technical solutions for end-users, and ensuring software applications operated smoothly.

IT Support Volunteer Intern   **July 2024-Present**
Mayor's Office of Informational Services
Performed end-user telephone support, including problem determination, resolution, and escalation, ensuring timely and effective problem tracking.

Mathematics Tutor   **Aug 2023-Present**
Hunter College
Instructed college-level Calculus 1, Calculus 2, and Matrix Algebra in small groups, leveraging analytical thinking and logical reasoning to simplify complex mathematical concepts.

Workshop Leader   **May 2024-June 2024**
Kodely
Led career-connected learning and design-based workshops for elementary school students, emphasizing basic engineering principles and technology fundamentals.

Skills

Programming Languages:
C++, Python, Javascript, SQL

Software:
Solidworks, Onshape, Microsoft Office, Google Suite
